

We offer a fully integrated process chain from a single source!

SMART SOLUTIONS FOR DRONE SYSTEMS

MACHINING CENTERS

High-precision CNC machining centers for complex and safety-critical components, such as structural and frame parts, housing components, as well as functional and connecting elements.

BATTERY ASSEMBLY LINES

Automated solutions for the assembly of battery modules and battery packs – designed for reliable, high-performance, and safe energy systems.

ACTUATOR & E-MOTOR ASSEMBLY LINES

Customized winding and assembly systems for high-performance drives and actuators.

COMPLETE ASSEMBLY LINES

Flexible, customer-specific assembly lines for drone systems – from low-volume production to high-output series manufacturing.

100 Years of Engineering Excellence

GROB BRINGS DRONES INTO SERIES PRODUCTION

GROB is an internationally leading supplier of high-precision manufacturing systems, with decades of experience in machining, assembly, and automation. GROB is your reliable system partner for the production of drone components.

What support do we provide?

GROB supports you from the prototype phase through scalable series production of drones. We ensure that your drones are manufactured efficiently, reliably, and to the highest quality standards.

What we deliver?

Customized production solutions for all key manufacturing steps – from machining and assembly to complete production systems.

Why we are the right partner for you?

- **QUALITY**
Premium production systems for maximum precision and stable, repeatable manufacturing processes.
- **KNOW-HOW**
100 years of experience across a wide range of industries.
- **ALL FROM A SINGLE SOURCE**
In addition to production systems, we provide processes, automation, and digital solutions – all from one partner.
- **VERTICAL INTEGRATION**
Our high level of in-house manufacturing ensures quality, precision, and on-time delivery – reliable and efficient.
- **GLOBAL SERVICE**
With our 24/7 hotline and worldwide service locations, we guarantee first-class customer support around the globe.

Ready for the next step in your drone production?

Contact our drone production experts now and start your series production.
