

We offer a fully integrated process chain from a single source!
SMART SOLUTIONS FOR HUMANOID ROBOTS

MACHINING CENTERS

Maximum precision for machining complex components, such as joint housings and structural components.

BATTERY ASSEMBLY LINES

Automated assembly of battery modules and battery packs to ensure a reliable and safe energy supply.

ACTUATOR ASSEMBLY LINES

Customized winding and assembly solutions for stators, rotors, and electric drive systems.

GENERAL ASSEMBLY LINES

Flexible and scalable assembly lines for humanoid robots – from small-batch to high-volume production.

100 Years of Engineering Excellence

GROB BRINGS HUMANOID ROBOTS INTO SERIES PRODUCTION

GROB is a global leading supplier of high-precision manufacturing systems, with decades of experience in machining, assembly, and automation. GROB is your reliable system partner for the production of components for humanoid robots.

What support do we provide?

GROB supports you from the prototype phase through scalable series production of humanoid robots. We ensure that your robots are manufactured efficiently and reliably.

What we deliver?

Customized production solutions for all key manufacturing steps – from machining and assembly to complete production systems.

Why we are the right partner for you?

- + **QUALITY**
Premium production systems for maximum precision and stable, repeatable manufacturing processes.
- + **KNOW-HOW**
100 years of experience across a wide range of industries.
- + **ALL FROM A SINGLE SOURCE**
In addition to production systems, we provide the process, automation, and digital solutions.
- + **VERTICAL INTEGRATION**
Our high level of vertical integration ensures consistent quality, precision, and on-time delivery – reliable and efficient.
- + **GLOBAL SERVICE**
With our 24/7 hotline and worldwide service locations, we guarantee first-class customer support around the globe.

We don't just deliver machines – we deliver solutions!

Contact our humanoid robotic experts today and start your series production.
